

June 23, 2014

Dear Emdeon Customers:

On June 23, 2014, Emdeon Inc. announced it had entered into a definitive agreement to acquire Capario, an innovative company providing industry-leading healthcare revenue cycle management solutions. The acquisition is subject to customary closing conditions, including expiration or early termination of the waiting period under the Hart-Scott-Rodino Act, and is expected to close in the third quarter of 2014. Until the deal closes, each company will continue to operate independently and will operate its business as usual.

The pending acquisition of Capario will increase Emdeon's value for our customers with an advanced real-time, cloud-based platform. When combined with the Emdeon Intelligent Healthcare Network™, Capario will enable us to bring innovative products to market faster and enhance our ability to help our provider customers manage their revenue cycle from end-to-end.

The CaparioOneSM cloud-based solution includes capabilities to:

- Verify eligibility in real-time
- Submit and track claims
- Manage rejections and denials
- Take patient payments in the office, online or over the phone
- Receive easy-to-understand business performance reports
- Give visibility into zero-paid claims
- Give an overview of accepted and rejected claims with associated dollar figures

With our combined capabilities, Emdeon will enhance our ability to provide a superior data-driven, patient-centric view of administrative elements of the care process, helping to improve outcomes and reduce cost.

We are excited about the future opportunities this acquisition will offer you, our customer, and the industry as a whole. Should you have any questions or need additional information, please do not hesitate to contact us.

Sincerely,

Neil de Crescenzo

President and CEO
Emdeon
