

## Leader or Laggard: See Where Your Organization Stands in the Coming API Revolution

APIs are quickly emerging as the currency of the digital health economy and **will dominate healthcare by 2023**, according to new research. Yet many healthcare organizations are out-of-step with this fast-moving trend and are at risk of being left behind.

### Nearly 90%

of healthcare stakeholders believe APIs are mission critical or quite important to their business strategies but only 24% are using them at scale.

### 67%

of providers project their organizations will be using APIs at scale in three years

### 61%

of payers project their organizations will be using APIs at scale in three years

### 51%

of healthcare tech vendors project their organizations will be using APIs at scale in three years

**Most** healthcare stakeholders agree that spending on APIs will increase this year.

Yet barriers to adoption remain, including

security

technical knowledge

technical infrastructure

and Privacy

## The clock is ticking

for stragglers who haven't embraced APIs.
