

# Simplify MIPS\* Quality Reporting with Change Healthcare

Under MACRA\*, payment models are shifting from fee-for-service to value-based reimbursement. To maximize reimbursement, providers must incorporate quality performance measures. But this data is difficult and time-consuming to collect and submit.

## Do you have the tools and knowledge to successfully navigate MACRA?

### Help Maximize Your Reimbursements:

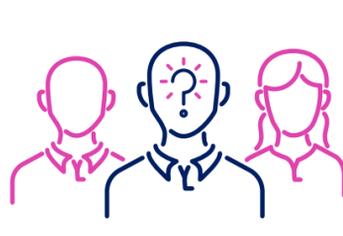

- This year's data will be used to determine physicians' reimbursement in two years.
- Payment adjustments will vary every year, depending on your overall composite score.
- Top performers can earn additional reimbursement.

### Spend Less Time Submitting Quality Measures:

- Medical practices spend an average of 785 hours per physician, costing them \$15.4 billion annually.
- Physicians spend an average of 2.6 hours per week.
- Staff spend an average of 12.5 hours per physician per week.

(Source: <http://www.pnhp.org/news/2016/march/burden-of-reporting-quality-measures>)

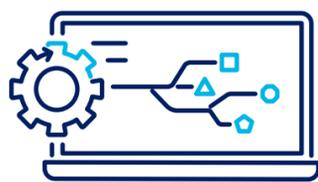

### Improve Your Reputation with a High Score:

- Each physician will be rated based on their overall composite score.
- Your score can affect not only your personal reputation, but also that of your hospital, and ultimately, your revenue stream.
- A poor score can make it harder to find and keep patients, recruit physicians, and promote your practice.

## Our Quality Reporting Solution Can Help

Satisfy The Joint Commission Patient Safety Goal of reporting Critical Results, and obtain maximum credit for MIPS quality reporting.

### Our Solution Consists Of:

#### Conserus Workflow Intelligence™

Use your existing Critical Results quality workflow for MIPS quality reporting.

- 1) Capture, communicate and report critical results
- 2) Send results to a qualified clinical data registry (QCDR) who sends your results to CMS for MIPS reporting

#### Medical Imaging Consulting Services

We can help you maximize reimbursement through customized services including a MACRA assessment, strategy development, governance building, and change adoption and management.

## Succeed with MIPS without Disrupting Your Workflow

- Make the MIPS quality reporting process more relevant, manageable, supportive and valuable
- Help maximize reimbursement opportunities
- Elevate your professional reputation
- Enhance your market competitiveness by leveraging data on quality
