

**Productivity Solutions for  
Radiology Practices**

# Help Maximize Your Radiology Practice Potential

Many radiology practices are trying to increase productivity and manage growth while still maintaining a high level of service to their hospital partners. But how can they grow effectively when it takes months to onboard a new hospital partner? How can they protect contracts if they can't measure quality and SLAs? How can they prepare for MACRA?

Change Healthcare offers a comprehensive, affordable suite of solutions designed for radiology practices, including a smart worklist, best in KLAS viewer and advanced analytics.

With 35 years of experience in the hospital market, we understand your partners and can offer you a solution that will help you increase productivity, maximize efficiency, and drive better outcomes,

# Your Path to a Successful Practice Starts With Smart Workflow

## Drive Efficiency and Productivity

No more swivel chairs.

Our enterprise worklist and viewing platform unify all your studies - no matter where they come from - into one easy to use reading cockpit.

Whether you're trying to meet your SLAs or maximize your subspecialists, our powerful rules-based engine is dynamic and intelligent. It takes your rules and applies them so every study is assigned to the right specialist, at the right time, in the right order.

Not only does it manage interpretation, it also facilitates quality workflows like peer review and critical results. You can incorporate these quality tasks into your daily workflows which lets you improve communication with clinicians and meet your regulatory requirements at the same time.

## Manage Your Growth

Our solutions are designed to scale with your needs to help you grow at your pace. They simplify the complexity of your practice today and can easily adjust if your business changes tomorrow.

The flexible rules engine automates assignment workflows, so even high-volume reading operations can be managed efficiently with minimal administrative overhead. It's complemented by a robust analytics solution that lets you measure your performance and quality. You can use the data to prove your worth whether your goal is to maintain the status quo, or win new business.

We know what it takes to connect and onboard new partners simply and affordably, and will work with you as you grow to help keep your business running smoothly.

"In the past, [radiologists] have struggled to remember workflows and prioritization models, but now rely on the system to organize their reading priority for them. This helps us stay compliant with our service agreements with the hospital."

-Dr. Evan Kaminer

## Improve Your Relationship With Your Hospital Partners

We understand hospital environments of all sizes, and can help you navigate the complexity that comes along with them. Whether you're trying to leverage their IT or communicate with your stakeholders across the health system, we understand what your partners are looking for. Our solutions are built with deep clinical expertise to give you the tools you need to successfully build a relationship.

We'll help your practice implement workflows that align your KPIs with your partners'. Our solutions also help you measure non-reading tasks like consultations or administration so you can prove your worth even when you're not interpreting studies.

The platform lets you collaborate and communicate better with the clinicians in the hospital. Closing the loop on Critical Results, ED communication, and Incidental Findings can help you positively impact your partners' performance and your own.

### About Change Healthcare

Change Healthcare is inspiring a better healthcare system. Working alongside our customers and partners, we leverage our software and analytics, network solutions and technology-enabled services to help them improve efficiency, reduce costs, increase cash flow, and more effectively manage complex workflows. Together, we are accelerating the journey toward improved lives and healthier communities.
