

Change Healthcare Enterprise  
Imaging Network™ Analytics

# Refine Your Imaging Operations

Gathering clear data and actionable insights on your medical imaging workflow and supporting IT processes can be challenging, especially given the typical profusion of siloed reporting systems. Reports on imaging archive updates, dictation, workflow, EHR, and ordering are adequate for local needs, but do not contribute to systemic performance improvement.

To balance workload and optimize processes, your leadership needs an accurate, holistic view of current and historic activity within your imaging department and enterprise. Change Healthcare Enterprise Imaging Network™ Analytics (Analytics) transforms aggregated, multi-source data into visually rich reporting to help improve your imaging operations.

# Leverage Your Imaging Data to Drive Performance Improvements

## Visualize Your Performance Data

Analytics is a scalable, cloud-native imaging analytics platform that automates data acquisition and synthesizes complex data from multiple sources. The platform provides dynamic data visualizations, key performance indicators, and problem-specific analytic workflows to help you rapidly realize meaningful insights.

Built on Amazon Web Services, the cloud-native platform follows third-party best-practice cybersecurity standards and offers guaranteed 99.999% uptime. Upgrades are frequent, automatic, and seamless to your staff.

Analytics is currently offered as a subscription-based solution as a service (SaaS), with basic and expanded content packages for on-premise radiology systems. Future reporting capabilities in development include on-premise cardiology, on-premise workflow, cloud archive, and more.

## Meet Your Needs With Customized Packages

Each Analytics content package is designed to advance your organization's progress along the analytics continuum.

**Core Package:** Share insights, export data, and drill into details to improve departmental operations.

- Historical data, descriptive analytics, volumes, basic turnaround times (TAT)
- Departmental activity reporting
- Data consumed ad-hoc or in standardized reports

**Premium Package:** Optimize organizational efficiency, quality, and revenue generation with deeper insights for data-driven decision making.

- Established data governance and aggregated analytics
- Additional standard data sets, including complete TAT trends and outliers, unreported studies, and productivity data
- Capacity and utilization metrics, plus staff utilization and productivity data
- Referral management data
- Comparative benchmarking
- Data consumed via interactive dashboards

Data discovery, measurement, comparison, and prediction tools help your team leverage analytics to explore common use cases and improve operational performance.

**Premium Plus Package:** Enable strategic growth with actionable claims data, population health management, and unlimited data sources.

- Scenario modeling
- Predictive analytics
- Customized dashboards and workflow
- Custom rules-driven task automation

## Connect to Our Cloud-Native Platform

Analytics is part of the Change Healthcare Enterprise Imaging Network™, a cloud-native SaaS platform. This next-generation platform is designed to help providers achieve better clinical and operational outcomes, including faster throughput and tighter security standards.

As individual components of the Change Healthcare Enterprise Imaging Network are introduced to the market, customers can gradually transition to a fully cloud-native imaging platform to achieve additional improvements in data transmission, interoperability, cross-discipline collaboration, and innovations in clinical capabilities.

Visit [our website](#) for more information about our cloud-native Change Healthcare Enterprise Imaging Network Analytics solution.

## About Change Healthcare

Change Healthcare is a leading independent healthcare technology company that provides data and analytics-driven solutions to improve clinical, financial and patient engagement outcomes in the U.S. healthcare system. We are a key catalyst of a value-based healthcare system, accelerating the journey toward improved lives and healthier communities.
