Imaging Data Integration & Migration

Make Your Next Data Migration Project a Success
When patient lives depend on accuracy and clinicians rely on content, it is critical that your imaging data is trustworthy. As a diagnostic medical imaging professional, you face the complexities of managing and migrating images, reports, and associated data on a regular basis.

Migrating your imaging center data is a critical component of a successful imaging enterprise initiative. Data migrations require careful technical and clinical consideration, as well as cautious execution to ensure data integrity and accuracy are maintained. Determining what data must be migrated is a painstaking process involving many criteria: clinical relevance, workflow, infrastructure risk, and policy.

Migrated data must also be normalized and formatted to standards for clinical use and confidence; some of the associated challenges include proprietary and non-DICOM formats. Large data migration projects can be daunting and fraught with prolonged timelines and/or extensive costs that place added strain on the bandwidth of your available resources.

**Data Management Solutions — Your Qualified Data Migrations Partner**

Choosing a data migration partner is one of the most important decisions you will make toward a successful outcome. We are uniquely qualified to provide you with both the expertise and the technology required to help reduce timelines and operational impact.

Our team of data migration experts is prepared to alleviate the burden on your staff by providing the necessary resources to build, extract, translate, test, and load data to your specifications. Partner with our Medical Imaging Consulting-Data Management Solutions team to leverage our longstanding market success and thorough understanding of the challenges and potential risks associated with data migrations.
Data Management Solutions Reduce Timelines and Operational Impact

Key Benefits
- Turnkey data migration solutions
- Experienced and reliable Data Management Solutions team comprised of various experts
- Complete consulting services support
- Rapid connector technology for successful large scale data migration projects
- Thorough understanding of industry clinical applications
- Ability to manage all types of media and proprietary files
- Comprehensive knowledge of Change Healthcare applications and databases

Three to Choose From

Three Data Migration Solution packages give you the freedom to choose the best-fit based on your available resources, tools, and funding.

Essential: Basic Needs
Covers basic image migration needs with essential professional services limited to data migrations.

Professional: Common Needs
Covers majority of common image and data migration needs with comprehensive professional services included and data alignment needs.

Premium: All-Inclusive
Covers all image and data migration needs with complete professional services included for all data alignment requirements.

Let Us Support You
Our Data Management Solutions team is backed by a successful industry track record of legacy media handling and data extraction to assist you in the design, deployment, and successful completion of your data migration. We have the engineering expertise, experience, and project leadership required to execute comprehensive data migration services. We offer strategic leadership so you can be confident your data will be migrated accurately to achieve your objectives.

About Change Healthcare
Change Healthcare is inspiring a better healthcare system. Working alongside our customers and partners, we leverage our software and analytics, network solutions and technology-enabled services to help them improve efficiency, reduce costs, increase cash flow, and more effectively manage complex workflows. Together, we are accelerating the journey toward improved lives and healthier communities.
